Examiners Amendment / Allowance

1. Authorization for this examiner's amendment was given in a telephone interview with Phillip Igbinadolor on 1/23/04.

The application has been amended as follows:

Please substitute the paragraph beginning at page 2, line 6 with the following new paragraph:

A' concl.
In addition, the object is to provide a recording device wherein the unit supports Internet access, on-line banking, stock market trading on the NYSE, NASDAQ and other exchanges, including commodity and precious stone/metal trading in the comfort, privacy, and convenience of a vehicle. Further, the object is to provide a wireless recording device with still pictures for use with the Internet.

Please substitute the paragraph beginning at page 6, line 4 with the following new paragraph:

Refer now to FIG. 13 for explaining numerals 40-42 in the several views of FIG. 1 wherein reference numeral 40 is an electronic pen/stylus herein referred to as STYLUS attaches to a detachable/affix stylus holder conveniently located to the left side of the unit electronic compartment frame. Reference numeral 41 is a perspective label of a manufacturer's leg logo inscription shown herein as inventor's leg logo for explaining designated location of leg logo. Reference number 42 is a preferred leg logo inscription herein referred to as PRODUCT LOGO of the device of the present invention.

Please amend claim 1 to read:

- A 2
1. An integrated car dubbing unit comprising:
 - a LCD screen,
 - a computer motherboard with optional ports,

cont.) wherein the microphone and camera provide telephone/video conferencing and capture impacts and unwarranted intruder for later review by authorities or aid in reducing insurance cost and an audible sound alerts a motorist when the camera senses fatigue in the motorist, and wherein the unit supports Internet access, on-line banking, stock market trading ~~on the~~ NYSE, NASDAQ and other exchanges, commodity, and precious stone/metal trading.

Drawings

2. Examiner requests applicant mail in copies of the formal drawings filed 11/26/03. The previous submission via fax resulted in certain features being blurred. Applicant **MUST BE SURE TO NOT ALTER, ADD, OR MODIFY IN ANY WAY THE DRAWINGS.**

Additionally, applicant must only include one copy of each Figure. Specifically, only include the Fig. 12 that is on a single page alone.

Reasons for allowance

3. The following is an examiner's statement of reasons for allowance: the closest art of record, the Lee (6,131,042) reference, does not teach or fairly suggest the fully integrated car dubbing unit comprising high speed dubbing and high speed memory erase capabilities, an audio/video surround sound microphone and infra red night vision camera, a full function fax and print delivery tray, a dual purpose audio/video track disk having software downloaded onto the motherboard that is used to reboot the CD player or re-configure the unit if there was a unit failure, wherein the unit detects satellite, AM/FM radio stations and television broadcasts

including new music release/live music-entertainment event and upon detection of a commercial break, station break, distortion or satellite interruption, the unit pauses a recording function until the commercial, station break, distortion or satellite interruptions are eliminated, wherein the unit downloads software/programming from satellite / wireless sources for backup purposes, wherein the microphone and camera provide telephone/video conferencing and capture impacts and unwarranted intruder for later review by authorities or aid in reducing insurance cost and an audible sound alerts a motorist when the camera senses fatigue in the motorist, and wherein the unit supports Internet access, on-line banking, stock market trading. While Lee teaches a radio receiver/tape player/recorder, features including Internet access with stock market trading, sensing fatigue in a motorist with a camera, pausing recording during commercial, station break, distortion, or satellite interruption are not taught by Lee. Integration of these components into the system of Lee is deemed to be patentably novel, useful, and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lees (4,397,531) teaches a system for sounding an alarm to wake a driver using camera fatigue detection, particularly col. 5:1-4.
